			ENCODING THE SAME
54) Title: NOVEL POLYP	EPTIDES AND NUCLEIC		ENCODING THE SAME
54) Title: NOVEL POLYP 57) Abstract The present invention erein are vectors and host can be present invention fused to	EPTIDES AND NUCLEIC A	ACIDS i	d to nucleic acid molecules encoding those polypeptides. Also provide squences, chimeric polypeptide molecules comprising the polypeptides s, antibodies which bind to the polypeptides of the present invention as
54) Title: NOVEL POLYP 57) Abstract The present invention erein are vectors and host of the present invention fused to	is directed to novel polypeptells comprising those nucleicon heterologous polypeptide se	ACIDS i	d to nucleic acid molecules encoding those polypeptides. Also provid equences, chimeric polypeptide molecules comprising the polypeptides s, antibodies which bind to the polypeptides of the present invention a
54) Title: NOVEL POLYP 57) Abstract The present invention erein are vectors and host of the present invention fused to	is directed to novel polypeptells comprising those nucleicon heterologous polypeptide se	ACIDS i	d to nucleic acid molecules encoding those polypeptides. Also provid equences, chimeric polypeptide molecules comprising the polypeptides s, antibodies which bind to the polypeptides of the present invention a
7) Abstract The present invention erein are vectors and host of the present invention fused to the present invention fused	is directed to novel polypeptells comprising those nucleicon heterologous polypeptide se	ACIDS i	d to nucleic acid molecules encoding those polypeptides. Also providequences, chimeric polypeptide molecules comprising the polypeptides, antibodies which bind to the polypeptides of the present invention a
54) Title: NOVEL POLYP 57) Abstract The present invention erein are vectors and host one present invention fused to the pr	is directed to novel polypeptells comprising those nucleicon heterologous polypeptide se	ACIDS i	d to nucleic acid molecules encoding those polypeptides. Also providequences, chimeric polypeptide molecules comprising the polypeptides, antibodies which bind to the polypeptides of the present invention a
54) Title: NOVEL POLYP 57) Abstract The present invention erein are vectors and host can present invention fused to the pr	is directed to novel polypeptells comprising those nucleicon heterologous polypeptide se	ACIDS i	d to nucleic acid molecules encoding those polypeptides. Also providequences, chimeric polypeptide molecules comprising the polypeptides, antibodies which bind to the polypeptides of the present invention a
54) Title: NOVEL POLYP 57) Abstract The present invention erein are vectors and host on the present invention fused to the	is directed to novel polypeptells comprising those nucleicon heterologous polypeptide se	ACIDS i	d to nucleic acid molecules encoding those polypeptides. Also provided equences, chimeric polypeptide molecules comprising the polypeptides, antibodies which bind to the polypeptides of the present invention a
54) Title: NOVEL POLYP 57) Abstract The present invention erein are vectors and host can present invention fused to the pr	is directed to novel polypeptells comprising those nucleicon heterologous polypeptide se	ACIDS i	d to nucleic acid molecules encoding those polypeptides. Also providequences, chimeric polypeptide molecules comprising the polypeptides, antibodies which bind to the polypeptides of the present invention a
54) Title: NOVEL POLYP 57) Abstract The present invention terein are vectors and host of the present invention fused to	is directed to novel polypeptells comprising those nucleicon heterologous polypeptide se	ACIDS i	d to nucleic acid molecules encoding those polypeptides. Also provided equences, chimeric polypeptide molecules comprising the polypeptides, antibodies which bind to the polypeptides of the present invention a
54) Title: NOVEL POLYP 57) Abstract The present invention tree and host of the present invention fused to the present inve	is directed to novel polypeptells comprising those nucleicon heterologous polypeptide se	ACIDS i	d to nucleic acid molecules encoding those polypeptides. Also providequences, chimeric polypeptide molecules comprising the polypeptides, antibodies which bind to the polypeptides of the present invention a
54) Title: NOVEL POLYP 57) Abstract The present invention erein are vectors and host on the present invention fused to the	is directed to novel polypeptells comprising those nucleicon heterologous polypeptide se	ACIDS i	d to nucleic acid molecules encoding those polypeptides. Also provided equences, chimeric polypeptide molecules comprising the polypeptides, antibodies which bind to the polypeptides of the present invention a
